MOBILE BIOMETRIC FINGERPRINT TIME & ATTENDANCE SYSTEM

BIOFINGER·T&A/MOBILE

START WORK TIME

END WORK TIME

Professional portable biometric system [BIOFINGER-T&A] based on fingerprint readers and BIOFINGER/SW software is easy plug&play installation and best solution for external contract works and every business that manage payroll on the road.

DESIGNED FOR:

- Building engineering and industry companies
- Construction companies
- Developers, property companies
- Contractors and construction workers
- Others

DATA TRANSFER:

USB PORT PenDrive
TCP/IP LAN socket
WAN Optional
WIFI Optional

ADVANTAGES AND BENEFITS
OF THE MOBILE BIOFINGER-T&A SYSTEM

The main functions of the mobile BIOFINGER-T&A system:

- time and attendance registration
- real working hours calculation
- employees attendance on-line monitoring
- interfaces with major payroll systems

USERS AUTHORIZATION MODE

- **FINGERPRINT**
- **RFID card**
- **PIN code**
- **RFID card + FINGERPRINT**

Benefits of the mobile Time&Attendance registration system that uses FINGERPRINT technology include the following:

- unambiguous identity of each user
- highest level of security
- short authorization time (less than 1 second)
- low cost of operation (no need to purchase RF cards)
- comfortable use of the system (no need to carry RFID cards nor memorize PIN codes)
- highest level of reliability
- ensure the feel of comfort and safety for users (both employees as well as the employer)

Only the biometric technologies, such as those employed within the mobile BIOFINGER-T&A system offered by PTC SECURITY SYSTEMS company, guarantee unambiguous identities of registered users (workers). Users of the mobile BIOFINGER-T&A system do not have to authorize itself with RFID card nor PIN code. Verification and identification of users can be done with any finger, registered in the memory of biometric terminals.

Biometric technologies eliminate all dishonest (fraudulent) practices of employees (workers). These dishonest practices commonly refer to workers who do not respect scheduled work time exactly, come late, leave before the end of work time, fake registrations using somebody else RF card or sign the attendance list as somebody else.

THE STANDARD MOBILE
BIOFINGER-T&A KIT INCLUDES

- special aluminium industrial carry case (38x26x13cm, width/height/depth)
- 1 biometric fingerprint terminal BF4-T&A
- software (English version)
- basic power supply (110/230VAC)
- cables (LAN, power supply)
- 1 LAN socket and power button with safety fuse
- short manual for users (English version)
- manual for system Administrator (English version)

Additional options:

- second biometric fingerprint terminal BF4-T&A
- buffer power supply 230VAC/13.8VDC, 1A
- rechargeable battery 1.2Ah
- GSM / WIFI module
- others

MOBILITY - DATA TRANSFER

- **USB port (PenDrive)**
- **TCP/IP (LAN socket)**
- **WAN (option)**
- **WIFI (option)**
